

# Rapid7's mission is to develop simple, innovative solutions for security's complex challenges.

## RAPID7®'S IT SECURITY ANALYTICS SOLUTIONS ENABLE YOU TO:

- Test your defenses
- Reduce your attack surface
- Detect compromise in minutes

12

Rapid7 has 12 offices globally, spanning the Americas, EMEA, and APAC.

3,000

Rapid7 has more than 3,000 customers across 78 countries.

30%

Our solutions are used by nearly 30% of the top 3000 global organizations.

200,000

Rapid7 Metasploit is backed by an open source community of more than 200,000 members.

45

With a Net Promoter Score (NPS®) of 45 puts Rapid7 is among the world's leading technology companies for customer satisfaction.

We understand the attacker better than anyone and build that insight into our software and services. Our IT security analytics collect, contextualize and analyze the security data you need to fight an increasingly deceptive and pervasive adversary, helping to dramatically reduce threat exposure and detect compromise in real-time. Unlike traditional vulnerability assessment or incident management solutions, Rapid7 provides insight into the security state of your assets and users, across virtual, mobile, private and public cloud networks.

## Products and Services

We offer advanced capabilities for vulnerability management, penetration testing, controls assessment, and incident detection and investigation. Rapid7 product offerings include the following:

**UserInsight™** helps you detect, investigate and stop threats faster with simplified discovery of user behavior, smart detection of attacks and fast incident response.

**Metasploit®** offers a clear view of how your network can be exploited, so you can focus your efforts and back up your action plan.

**Nexpose®** analyzes vulnerabilities, controls, and configurations to find the who, what, and where of IT security risk. It uses RealContext™ and a knowledge of the attacker's mindset to prioritize and drive risk reduction.

**ControlsInsight™** measures how well critical security controls are deployed and configured across endpoints and servers, including the state of your antivirus, code execution prevention, password hygiene, and more.

**Rapid7 Professional Services** is skilled and ready to help – Our experts share vital, real-world knowledge about security best practices so that security teams operate more efficiently and make decisions that dramatically improve the ways they solve the cyber-security challenge. We offer strategic services to help you build a bespoke and resilient security program, based on the specific threats to your organization and its risk profile. We can help you deploy and use our products more effectively, conduct full-scale penetration testing for compliance or security program requirements and certify your staff in the use of our products.

## Customers

Rapid7 provides products and services to a broad spectrum of customers and organizations, including some of the world's largest financial institutions, healthcare and energy providers, technology and communication companies, universities, retailers and manufacturers, as well as U.S. and other national, state, and local government agencies.

We also offer Rapid7 Voice, a program that gives customers the power to influence and learn firsthand about Rapid7 innovation with visibility into our product and services roadmap. Rapid7 Voice ensures that we're meeting customer needs – today, and in the future – and provides our customers with the opportunity to gain hands-on involvement in product development.

## Partners

Rapid7 is deeply committed to its partner network of more than 60 active consultancies, resellers and MSSPs around the world. Rapid7 technology integration partners include FireEye, HP, Splunk, Sourcefire, and VMware, to name a few.

## Community

Rapid7 is strongly committed to supporting the broader security community through its free software, open source projects and security community events. We run the Metasploit Project, the largest open source project for penetration testing, and sponsor several other open source projects. Our free software is downloaded more than one million times per year and enhanced further by over 200,000 community users and contributors.

Rapid7 is the founding organization of the Coalition for Security Research, a not-for-profit organization established to improve security for everyone through the protection and promotion of security research.

## Reduce Threat Exposure & Detect Compromise

### Threat and Vulnerability Analytics

Identify, analyze and prioritize threat exposures to reduce the attack surface

### Compromise Detection and Investigation

Detect and investigate compromised users, accounts, and credentials

### Professional Services

Security program development, penetration testing, deployment and training

## Awards and Recognition

Rapid7® has been recognized as one of the fastest growing security companies by Frost & Sullivan and a Best Place to Work by the Boston Business Journal. Our solutions are top rated by Gartner® and SC Magazine. The Rapid7 support team was presented with a Silver Stevie Award for Best Frontline Customer Service.
